CONNECTIVITY

From Cab to Cloud–Your Data, Always Within Reach

Your Data, Anywhere You Need It

Viewing and transferring data outside the cab isn't always easy—but Central Valley Ag can simplify it. With Panorama™ from Precision Planting or AgFiniti® from AgLeader, you get seamless connectivity via Wi-Fi, allowing you to access maps, input summaries, and agronomic data right from your phone, computer, or preferred platform.

Whether you're in the field or at your desk, get a clear view of your operation to support better decisions—now and in the seasons ahead.

Access Your Data Anywhere

View real-time data from outside the cab—anytime, anywhere—via the app or website.

Agronomic Insights at Your Fingertips

Generate prescriptions in real time—without needing to understand soil chemistry.

Easily analyze row-by-row maps, yield comparisons, and field averages through a user-friendly, agronomy-focused interface designed to support smarter decisions.

Seamless Sync

Connect with other digital platforms to seamlessly map, report, and analyze all your information in one place anytime, anywhere, and on any device.

Smart Data Collection & Sharing

Take pictures and notes in the field, print maps and reports, and securely share files—individually or automatically—with trusted advisors and platforms.

Connectivity for Clearer Field Analysis

Upload and view maps and reports all in one convenient place.
